SOLUTIONS

STILLWATER SOLUTIONS™ FLY PROGRAM

- ▶ Designed by still water experts Brian Chan and Phil Rowley
- ▶ Over 30 proven patterns in a comprehensive range of colours and sizes
- ▶ All flies are tied with premium Stillwater Solutions™ tying materials on chemically sharpened, Japanese hooks
- ▶ Each fly is tied to Brian and Phil's exact specifications
- ▶ Fly assortment covers all the major still water food groups
- ▶ Pattern range is effective all season in lakes, rivers, spring creeks and tail waters
- ▶ Fly fishers can now use the same stillwater fly patterns Brian and Phil use.

■ CHIRONOMIDS ■ MAYFLIES ■ CADDIS ■ DAMSELS & DRAGONS ■ LEECHES ■ SCUDS & WATER BOATMAN

BLACK SALLY

Size #10, #12, #14

A fantastic pattern that works all season long, when all else fails feed them black and red!

CLEARWATER PUPA

Black, Brown, Dark Olive, Crimson, Size #12, #14, #16

Try this pattern on pressured water or trout that have seen their fair share of beadheads. Trout find the slim realistic profile of this pattern tough to ignore.

COLLABORATOR

Burnt Orange Size #10, #12, #14

The perfect pattern when trout are focused upon "carrot" chironomids, common to many western stillwaters.

GREEN & RED MIDGE LARVA

Size #08, #10, #12

Chironomid larva are an overlooked stillwater staple. This an ideal pattern to probe the water early in the day, during low light conditions or when trout are in an opportunistic frame of mind.

GREEN BACK PHEASANT/ RED BACK PHEASANT

Red/Claret, Green/Light Olive
Size #10, #12, #14

This trout catcher is a perfect blend of natural and synthetic materials. Suspend this fly beneath an indicator and hang on.

HOLO WORM

Red Size #12, #14

The gold bead head and marabou tail animates this pattern suggesting the natural motion of a chironomid larva. Present this pattern slowly just above the bottom.

MAROON CHIRONOMID BOMBER

Size #10, #12, #14

Large "bomber" chironomid species are commonplace on many western stillwaters. This is a big fish fly and the perfect choice when fishing nutrient rich muddy bottomed lakes.

RED BUTT BROWN CHIRONOMID PUPA

Dark Red Brown Size #10, #12, #14

This universal pupal pattern has a proven track record on not only western lakes but stillwaters worldwide, a fantastic pattern to start with.

RED BUTT BUZZER

Claret, Olive, Summer Duck, Black
Size #08, #10, #12

A deadly pattern, the UV Crystal Flash beard twinkles in the depths attracting trout from a distance and making this pattern stand out in a sea of naturals.

SUMMER DUCK PUPA

Size #10, #12, #14

The unique coloration of this pattern mimics a myriad of chironomid species in both clear and stained waters. Don't leave home without a few of these deadly pupa stashed in the fly box.

CLEAR WATER CALLIBAETIS

Callibaetis, Light Olive Size #12

With sleek lines and natural color scheme this fly is the perfect match for Callibaetis nymphs of all sizes. The dark back and light underside mimics the natural nymphs.

HERL MAY

Callibaetis, Light Olive, Olive, Olive Dun
Size #12, #14, #16

The ideal pattern for the Callibaetis enthusiast, the slender lines of this pattern along with the fine ostrich herl fibers dupe even the fussiest trout.

GRIZZLY SEDGE PUPA

Olive Size #06, #08

This pattern pulses and glimmers, try presenting this pattern near the bottom using a slow hand twist retrieve. Switch to a 3-4 inch strip retrieve to mimic the ascending pupa

RAINBOW EMERGER.

Size #12, #14

When trout are feeding at the surface this pattern pays huge dividends. Just cast this fly toward feeding trout and commence a slow handtwist retrieve and wait for the line to tighten.

STILLWATER CADDIS EMERGER

Olive Size #10, #12

When a caddis emergence is on and trout are focused upon hatching pupa and transitional adults don't be without this pattern.

STILLWATER CADDIS PUPA

Dark Olive Green, Dark Summer Duck Size #06, #08, #10, #12

The perfect pattern for probing the shoals just prior to and during a caddis or sedge emergence, its scruffy nature makes it a perfect searching pattern as well.

BABY DAMSELFLY NYMPH

Olive Size #12, #14

At certain times of the year trout key in on immature damsel nymphs. This is an excellent pattern to suspend beneath an indicator and work amongst the weed pockets.

FLY CRAFT FULLBACK

Dark Olive Green Size #08, #10, #12

Scruffy and suggestive this pattern mimics a wide variety of prey items. At the start of the day or in the absence of a hatch probe the depths using this consummate searching pattern.

GRIZZLY DAMSEL NYMPH

Olive, Light Olive, Callibaetis Size #10
Incorporating the natural motion of grizzly marabou, this pattern pulses and breathes under the slightest of retrieves. This suggests the snake-like swimming motion of a damsel nymph.

GRIZZLY DRAGON

Olive/Light Olive Size #06

The buoyant core of this shaggy pattern allows fly fishers to creep this pattern amongst the weedy haunts dragons prowl. Use a short leader and fast sinking line to drag this pattern into the depths.

MATURE DAMSELFLY NYMPH

Olive, Olive Dun Size #10

Aimed at suggest the mature damsel fly nymph this pattern is perfect when large mature nymphs prowl the weeds or during their emergence trek toward shore.

PEARLY DAMSEL

Olive, Light Olive Size #10

Work this pattern in and amongst the weedy fringes of your favorite lake. The mono eyes create a realistic profile capable of fooling numerous trout.

BLACK/RED SPARKLE LEECH

Size #08, #10

Leech patterns are ideal searching patterns and for probing the shallows during the twilight hours and into the night. Be prepared for bone jarring strikes with this pattern.

DEEPWATER LEECH

Maroon/Purple Size #06, #08

With a color scheme specifically selected for its visibility this pattern is the choice when probing the depths on bright days, during the summer doldrums or along a drop off.

LAS VEGAS LEECH

Peacock Size #08, #10

This pattern's gaudy nature draws an aggressive trout from a distance. The Crystal Chenille body sparkles in both clear and stained waters and is more than able to awaken slumbering trout!

PITCHING LEECH

Olive, Brown, Claret Size #10

Designed for the catatonic approach of dangling flies under an indicator the bead head and long flowing marabou tail pitch up and down providing a seductive action trout just can't resist.

WASTE TROLL LEECH

Olive/Light Olive, Olive/Brown Size #08

Once wet this scruffy somber pattern really works its magic as the grizzly marabou fibers spring to life convincing the fussiest trout. It is the perfect pattern for clear waters or spooky trout.

FLASH-BACKED SCUD

Olive Size #12, #14

Fooling trout in scud clogged waters can be daunting. How does a trout isolate the fraud from the natural? The built in flash of this pattern provides an eye catching twinkle for trout to home in on.

OSTRICH SCUD

Olive, Light Olive Size #14

When trout are prowling the marl flats or scouring the shallows tiny Hyalella scuds are preferred prey. This pattern is the perfect match for these conditions and spooky clear water trout.

PEACOCK WATER BOATMAN

Size #12, #14

The Crystal Chenille body shines and glimmers suggesting the air bubble water boatman use to breathe beneath the surface. This is a deadly fly during spring and early autumn.

PREGNANT GAMMARUS SCUD

Olive Size #10, #12

Trout often focus upon pregnant scuds or those infected by a parasite known as Acanthocephalan. The orange midriff of the Pregnant Gammarus Scud is the perfect solution to this focused feeding.

SPARKLE BLEND SCUD

Olive, Dark Olive Green, Callibaetis Size #12

This pattern offers the ideal scud silhouette. Work this pattern along windswept shorelines, amongst weed pockets or hang it beneath an indicator.
